## **DETAILED ACTION**

### ***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 3/26/04 has been considered by the examiner.

### ***Additional Art Cited***

Tomita et al discloses a scanning optical apparatus for scanning a light beam on a scan target surface (7). The scanning optical apparatus has a light source (1); a collimator lens (2) for collimating the light beam emitted from the light source; a first optical system including a fixed lens group (12;16) and a movable lens group (4); a deflecting system (5); a second optical system (6); and a moving mechanism for holding and moving the movable lens group so as to correct the field curvature. See Figs. 13a-15b, 18a-18b, 20-21.

### ***Allowable Subject Matter***

Claims 1-7 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention defined a scanning optical system for simultaneously scanning a plurality of light beams on a scan target surface. The scanning optical system has a particular feature "a moving mechanism ...  $Mp1 \times Mp2 = 1$ " (claim 1, fourth paragraph) for adjusting the pitch of line images without shifting (1) the line image formation position

from the position in the vicinity of the reflecting surface of the deflecting system and (2) the focal point from the scan target surface (specification, page 18, line 10, through page 19, line 4). None of the cited prior art teaches or fairly suggests a scanning optical system having the particular feature in combination with the remainder features recited in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Phan whose telephone number is (571) 272-2317. The examiner can normally be reached on Monday-Friday.
